Terms and Conditions.......................................................................................................................18
This manual contains operating instructions for the use of the LifeSafer L 250 Ignition Interlock Device (IID) with or without a camera. Not all jurisdictions require the addition of a camera. If you are not required to have a camera please disregard any instructions on camera usage.

The purpose of an IID is to prevent vehicle start-up until the user has passed an alcohol test. The IID is not an indicator of your level of impairment or your ability to safely operate a vehicle. You must rely on your own judgment. If you have been drinking alcoholic beverages, please find an alternative form of transportation.

This handbook explains the use of the LifeSafer L 250 IID, including operation, reporting and care of the unit. Please take the time to read this handbook while you are waiting for the IID to be installed in your vehicle, so any questions you may have can be answered before you leave.

Today, you will be trained on the proper use of the LifeSafer L 250 IID. Your service provider will also confirm the date of your first service appointment. This date will also be programmed into the device. At each service appointment the device’s event log will be downloaded and reported to your Monitoring Authority.

**WARNING:**

It is your responsibility to keep your IID in good working order. You will be responsible for any lost or damaged parts of the unit. Please call 1-800-634-3077 for details on our Loss Protection Plan.
The following screens will appear, in order, once you have powered up the device. You will have 60 seconds to take a test before the device will automatically power down. To manually power down the device, press and hold the Up or Down button for 3 seconds.

**Powering Up the Device:**
To turn on the device turn the vehicle ignition switch on.

**State Camera Requirement**
Some States require the addition of a camera so that the person taking the test can be identified and submitted to a monitoring authority as part of the reporting process.

The camera will be installed and aligned as part of the device installation process. Your service provider will make sure that the focus, field of view and operation of the camera is working correctly before you leave. Therefore, there will be no need for you to touch the camera during testing or any other time.

**Wide Range Of View**
Due to the camera’s wide range of view, you will not need to look directly at the camera while blowing into the device during any test you need to take while in your vehicle.
A warm up screen will count down the time until the device is ready for you to take the test. Typically the device will warm up in a matter of seconds. During periods of extreme cold the device may take up to 3 minutes to warm up. You can program three, twenty minute periods in 24 hours when the device will automatically power-up and be ready for a test when you get into your vehicle. For more details on how to program warm up times see page 10. Page 16 provides more information on using your device in extreme cold conditions.

To successfully complete a test you will need to blow into the mouth piece long enough and with sufficient pressure while generating a hum tone created by saying the word “DO” as you blow. Once you start to blow and hum the device will emit a continuous tone which will stop once you have completed the test.

The wait screen will appear while the device analyzes your breath sample.

Results:
The Pass screen indicates that your alcohol level is below the predetermined level. This screen will be immediately followed by the Start Engine Now screen, indicating you can now start your vehicle.

Depending on your jurisdiction, you will have between 60 seconds and 3 minutes to start your vehicle. If the engine is not started within this time, your device will go into “sleep” mode and you will need to take another test before you can start your vehicle.

If you receive the Alcohol Warning screen this means that a low level of alcohol has been detected, but is not enough to result in failed test. However, should your breath alcohol content rise while you are driving you may fail subsequent re-tests.
The fail screen means that your breath sample has an alcohol level above the predetermined level and you will be unable to start your vehicle. Your first fail test will be followed by a mandatory 2 - 15 minute (depending on jurisdiction) temporary lockout. Depending on the jurisdiction’s requirements, one or more fails will result in a temporary lockout. Additional lockouts will occur for subsequent failures. The durations of these lockouts is set by the jurisdiction.

If during your test attempt you receive an Abort screen you have not failed the test. This just means that the device was unable to analyze your breath sample. There are a number of things that can cause an abort, such as blowing too hard, blowing too softly, not blowing long enough or not humming properly. The device will present you with an Abort screen detailing what the issue was.

Driving:
Once you have passed a test and are driving your vehicle you will be required to take a number of re-tests. Typically your first re-test will be shortly after the vehicle is started and at random intervals thereafter. In between re-tests the devices screen will continuously display “DRIVE SAFE”.

To ensure the utmost safety while driving, the re-test notification screen display is just one word “BLOW”.

When the device requires a re-test you will also hear two high pitched beeps. You will have a limited time to take the test, typically between 3 and 10 minutes, depending on your jurisdiction.

Until the device receives a passed test the following will occur:
• After a few seconds the initial beeping will get louder.
• After a short time additional alarms may be activated. Dependent on your jurisdiction, this may include your vehicle horn and/or emergency lights or headlights flashing.
• Depending on the jurisdiction, the additional alarms will continue until the breath test is passed, or the vehicle is turned off.

Failure to take and pass a test within the specified time may result in a violation being reported, depending on the jurisdictions requirements.

A failed retest may result in a violation and an Early Recall (see page 15)

SAFETY BRIEFING
Always exercise safety first. The L 250 is designed with audible and visual direction to allow you to safely retest while driving. However, if you feel uncomfortable taking a test while driving you should safely exit traffic and stop your vehicle before taking a test.
If your vehicle stalls, or is turned off, you will be presented with this screen and, depending on your jurisdiction, you will have 2 - 5 minutes to re-start your vehicle without having to take a test.

Note: This feature is disabled if a retest request is in process, has been ignored or was failed.

**MENU OPTIONS**

The device is configured to make the testing process easy. Therefore, it is preset to take you quickly to the Alcohol Test option. However, there are some other menu options that you may need to use at some point during your program.

When installing your device, your Service provider will pre-set your device to the appropriate language. However, if you need to change this option you can use the Left and Right buttons below the screen. Once the Settings screen is displayed you can use the Up and Down button to choose the setting you would like to change.

**PRE-SET WARM UP TIMES:**

During extreme cold weather any interlock device may take up to 3 minutes to warm up and be ready for testing. Your LifeSafer device allows you to program up to three, twenty minute periods in 24 hours when the device will automatically power-up and be ready for a test when you get into your vehicle. There must be at least 4 hours between each programmed 20 minute period.

*NOTE: If you detach and re-attach the handset the device will remember your pre-set warm-ups and will automatically warm-up at the next programmed time.*

To set up warm up times go to the Settings Screen and use the Up and Down Button to set-up each time.

A help screen can be accessed by using the Left or Right buttons below the screen. This will display the LifeSafer customer support number that you can contact for assistance.
The device has been designed to make it easy to use. You may, however, encounter some of the following displays during or immediately after blowing an Alcohol Test.

A Hum tone is required by the jurisdiction. Hum, or say the word “DO” while blowing.

This is one of the Abort explanation screens and means that you have blown longer than the required time.

This abort explanation means that the breath sample delivered was insufficient.

The Blow Softer abort occurs when you are blowing too hard. Blow softer when you retest.

The breath temperature abort occurs when the breath blown into the device is inconsistent with the normal temperature of human breath. This may be due to you drinking an iced drink or exercising in the cold just before a test. If so, just wait a few minutes and try again.

After several consecutive aborts you may receive a tip screen with direction on how to successfully complete a test.

Displayed when the vehicle’s battery is low. You will need to re-charge or replace the battery to ensure that the device continues to work effectively.
Periodically you will be required to have the device’s data downloaded, reviewed and reported by the service provider to the relevant regulatory authority. The device, vehicle and wiring may be inspected for signs of tampering, and the calibration of the device will be checked.

The following is an example of the information the device records and the type of information that the service provider may be required to report:

**Recorded Violations:**
- **Start-up Violations** – Starting the vehicle without passing a test within the required time frame, which varies by jurisdiction.
- **Power Disconnect** – Power is lost to the device’s Relay Box. You should document any reason why the power was disconnected.
- **Failed Test** – Failing one or more test attempts indicating BrAC at or above the Fail level.
- **Retest Refused** – The driver failed to pass a Retest during the allowed period of time.
- **Retest Failed** – The driver took the Retest and Failed one or more test attempts at or above the Fail level.
- **Lockouts** – The number of Lockouts between service is recorded.
- **Early Service Recall** – If you have met the maximum number of any Violations an Early Service Recall will be recorded and the device will prompt you to return to the Service Center.
- **Time of Vehicle Use** – All vehicle starts are recorded and may be used to determine if the vehicle was operated during a restricted driving time.

**Required Reporting:**
- **Non Compliance**
  - Failure to report for scheduled monitoring check or any Early Recall that results in a Lockout
  - Failure to pay for program services provided
  - Failure to meet any other terms and conditions of the Interlock Program

**Circumvention**
- Getting someone else to blow the breath test
- Providing a breath sample using a pump, balloon etc. instead of human breath sample.
- Disconnecting the vehicle’s battery without Authorization from the Service Provider
- Attempting to move or obscure the camera.

*Note: If the camera falls from where it was installed contact your service provider to have it re-mounted.*

**Tampering**
- Breaking of any anti-tampering seal on any part of the device including wires and connectors
- Opening the device
- Physically damaging the device in any way

The device will remind you of your scheduled service date by displaying a Service Reminder screen showing the date and time of your appointment. Depending on your jurisdiction, the first reminder will be 7 - 10 days prior to your appointment date. To remove this screen press the Right button below the screen.

You can check the date prior to the automatic reminder times. DO NOT turn the vehicle’s ignition on. Simply press the UP or DOWN button on the handset, hold for 5 seconds and once the device powers up press either the right or left button to scroll to the Service Reminder screen.

*Note: This date was programmed into your device at your last visit. If you change the date or time of your next appointment it will NOT be updated on your device.*

If you do not return for service by the required date you will enter into a grace period between 3 and 10 days (depending on your jurisdiction) and the screen will change to a “Lockout Starts Warning” screen with the date the device will enter Permanent Lockout if it is not serviced.

If the device goes into permanent lockout you will not be able to take a test or start your car. If this happens you will need to call your service provider to obtain a Lockout Override code, or have your vehicle towed at your expense.
SERVICE/MONITORING APPOINTMENTS

The reason for the lockout is shown at the bottom of the screen and may include Service Date (meaning you are past due for service), Event Log Full, Device Failure, Bypass, and Violations.

If you have to change a scheduled monitoring appointment, you will need to call 1-888-769-6080 24 hours in advance to avoid a Missed Appointment Fee.

Early Recall:

Many Violations recorded by the device will require an Early Recall. This means that you must return to your service provider to have the device’s data downloaded, interpreted and reported. Depending on your jurisdiction, you will have 3 to 10 days to return to your service provider before the device enters Permanent Lockout.

You will be advised of the Early Recall requirement via the Lockout screen. It will display the date and time the lockout will start along with the Reason: Violation.

The device monitors its own functionality in accordance with fail-safe technical requirements. Any type of malfunction or failure that could affect the reliability or accuracy of the device’s test results will also put the device into Early Recall. This will again result in a Lockout screen advising of the date, time and reason for lockout.

Lockout Override Code:
The device has the ability to have a Lockout Override Code entered.

- Use of the code will temporarily lift the lockout, as defined by your jurisdiction, and will allow normal operation of the device and vehicle.
- You must call LifeSafer at 1-800-634-3077 for the code.

Vehicle Electrical Systems

The device operates off your vehicle’s electrical system. If your vehicle is over 10 years old, you should have the electrical system checked by an automotive professional. If your vehicle has electrical shorts or a failed alternator, the power surges can damage the device and void the warranty. If applicable, maintain proper water-levels in your car battery (use distilled water) and keep the terminal connections clean and free of corrosion. The device will usually work with an old battery, but bad or weak batteries are the primary cause of problems that can result in Early Service Recall and an unscheduled visit to the service provider at your expense. If your car battery is weak or old, ask your LifeSafer Service Provider what your jurisdiction’s regulations are for having it replaced. Since all power disconnects are recorded and reported, you must document each time the battery is disconnected, or the device is disconnected from power. We have provided a chart on page 15 where you can document all disconnects.

Extreme Cold or Heat

It is recommended that you disconnect the device’s handset from the coil cord and take it inside during extreme conditions. Since the handset is disconnected and not using power, this will not only help with the wait for warm-up, but will also ease the load on your vehicles battery during these periods. When the handset is disconnected do not allow it to become excessively moist, hot or cold. In extreme heat, removing the device and taking it indoors will protect its sensitive components and will help ensure you will be able to drive if your car has been in a very hot place for an extended period of time.

Avoid Contact with Moisture and Dirt

The device is not waterproof. It is an electronic product. Keep it out of the rain. Keep the device stored off the floor of your vehicle. Excessive contact with moisture, dirt, mud, or rain will damage the internal circuitry for which repair or replacement of the device is your responsibility.

Avoid Electro-Static Discharge (ESD)

Place the key in the ignition before picking up the handset. ESD, especially during the cold and dry winter months, is common and may damage the device.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This product has been tested and complies with the specifications for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used according to the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which is found by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna
• Increase the separation between the equipment or devices
• Connect the equipment to an outlet other than the receiver’s
• Consult a dealer or an experienced radio/TV technician for assistance

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

1. IGNITION INTERLOCK SYSTEM:

The System is owned by the Service Provider and not by the Client. The Client shall not acquire any ownership interest in or title to the System. The Client shall not, directly or indirectly, encumber or otherwise impair title to the System. The Client agrees to keep the System free and clear of all liens and encumbrances and will refrain from removing insignia or lettering on the System which indicates the Service Provider’s ownership.

The Client shall return to the designated service center to have the System removed from the Vehicle when the Term ends. If the Client does not do so within five (5) days after the end of the Term, then the Service Provider and its employees, agents, and representatives shall have the right to recover possession of the System from the Vehicle whenever it is located without such entry being deemed to be a trespass or other unlawful act. The Client appoints the Service Provider as the Client’s lawful agent for such purpose, with full power of substitution and with full authority to gain access and entry to the Vehicle and to remove the System from the Vehicle by whatever means required. Neither the Service Provider nor its employees, agents, or representatives shall be liable for any loss or damage occasioned thereby, and the Client agrees to indemnify and hold harmless the Service Provider, its affiliates, and their respective employees, agents, and representatives from and against any liability arising therefrom.

2. PAYMENTS:

The Client agrees to pay the Service Provider for all fees, charges, and other amounts arising under this Agreement, including those fees and charges detailed in the Fee Schedule. Except as limited by law, regulation, the Program terms or Administering Authorities, the Fee Schedule is subject to change at any time, with or without advance notice, and in the sole discretion of the Service Provider. Fees and charges payable include but are not limited to:

Installation Charge: This charge covers installation and training to familiarize the Client with the use and function of the System. Any changes to or additions of vehicles during the Term shall result in additional charges.

Monitor Fee: This charge is for the use of the System and scheduled monitoring based on the minimum number of monitoring days detailed on the Fee Schedule. Monitoring more frequently than specified in the Fee Schedule will result in an Early Service Fee. Service Provider’s ownership. The Early Contract Termination Fee is due and payable upon the Client’s termination of the Agreement, and as such is not chargeable to the Client for time spent (including preparation and travel time), materials used, and costs incurred at the rates set forth in the Vehicle Fee Schedule version AF201411. The Service Provider must receive payment from the Client of the estimated total amount due in advance of any work by the Service Provider, regardless of who requests the Service Provider to appear or provide information. Any amounts due from the Client for services not performed due to adverse weather, or similar factors, shall be charged and paid upon the date of invoice for the excess.

Taxes: The Client is responsible for all taxes assessable on charges payable by the Client.

Enforcement Costs: The Client will pay all charges, costs, and expenses incurred by or on behalf of the Service Provider in collecting or attempting to collect amounts due under this Agreement or otherwise taking steps to enforce this Agreement, including steps to recover the System, including collection fees, attorney’s fees, and court costs.

17

18
3. MONITOR APPOINTMENTS: The Client shall return the Vehicle to the designated service center, which the Service Provider may reasonably change from time to time, for regularly scheduled monitoring as confirmed with the Client when the System is monitored. If an early recall is announced via the lights and tones of the System, the Client is obligated to return the Vehicle to the designated service center for unscheduled monitoring within the number of days prescribed by the System.

4. SERVICE PROVIDER'S RESPONSIBILITY: Neither the Service Provider nor any of its employees, agents, or representatives shall be responsible for any loss or damage to the Vehicle or its contents during any installation, servicing, monitoring or removal of the System. The Service Provider will repair or replace any damaged System and shall be responsible for all costs of repair or replacement. The Client shall be responsible for all costs of repair or replacement of any System repairs that are not made during routine monitoring or scheduled maintenance.

5. INDEMNIFICATION: The Client agrees to indemnify and hold harmless the Service Provider, its affiliates, and their respective employees, agents, and representatives from and against any and all claims, demands, actions, costs, and expenses whatsoever that may arise, directly or indirectly, out of any act or omission of the Client, other users of the Vehicle, or persons under their care, custody or control, relating to the Client's participation in the Program. Such indemnification obligation shall continue after the Term. The Service Provider, its affiliates, and their respective employees, agents, and representatives will not be liable or responsible for any bodily injury or property damage caused by any nature whatsoever that may be suffered by the Client, other users of the Vehicle, or any other person, resulting directly or indirectly from the Client's participation in the Program.

6. PERSONAL DATA COLLECTION AND REPORTING: The Client acknowledges that the System contains various personal data collection, recording, monitoring, storage, and reporting capabilities, which may include a camera and/or global position satellite (GPS) capabilities. The Service Provider may collect, review, store, transmit, and report information about the Client, the System, the Vehicle, or the Program to the Administering Authorities, to other governmental, law enforcement, or judicial authorities, or to other persons or entities whom the Service Provider reasonably believes are necessary in order for the Service Provider to perform its services, carry out its obligations with respect to the Program or the System, or fulfill its obligations under applicable law.

Client to sign below only if electing to opt out of the Plan:

Client Name (Print): ____________________________
Client Signature: ____________________________ Date: __________

7. LOSS PROTECTION PLAN (“Plan”): provides that the Client’s financial responsibility for damage to or loss of the System shall be limited to the Plan loss liability amounts indicated on the Fee Schedule. The Client shall be automatically included in the Service Provider’s Loss Protection Plan and responsible for payment of the Plan’s fees as indicated on the Fee Schedule unless the terms of the Program do not permit the Client’s participation in the Plan. Should the Client elect to opt out of the Plan by signing below, the Service Provider reserves the right to terminate the Plan if the Client has two (2) or more claims under the Plan during the Term or the Client does not pay the Plan’s fees. However, in no event shall the Plan limit the Client’s responsibility to the loss of the System caused by a willful act or omission of the Client or any permitted user of the Vehicle, if the System is lost or damaged while covered by the Plan, then the Client must present a copy of the applicable police report along with any other evidence of the loss and pay the Service Provider the applicable liability fee within seventy-two (72) hours of the loss. If the Client elects to opt out of the Plan by signing below, and as permitted by the Program, or if the Plan is suspended or terminated, then the Client is responsible for any loss or damage to the System (up to the amount indicated on the Fee Schedule for a complete loss of the System).

Terms & Conditions (Continued)
24-Hour Service Assistance

• We are always here to help you – 24 hours a day.

• If you call after business hours, please listen carefully to the prompts which will allow you to leave a message, or speak to a Customer Care Agent.

• The Customer Care Agent will try to alleviate the issue if possible.

• To schedule an appointment
• To make a payment
• For assistance
• If you experience any issues with your device
• If the device is notifying you that it needs service
